Web 1.0 - CSS1 Home Work

Your homework comes in 2 parts, both of them are to create a menu very much like that of a common website.

For part 1, the process will be broken into small steps as a guidance.

For part 2, you're on your own.

Part 1: a horizontal menu

1.1: **Create a new html document, then add to the content of this page a new <nav> element following the html structure:**

```
<nav class="menu">
  <span>Item 1</span>
  <span>Item 2</span>
  <span>Item 3</span>
  <span>Item 4</span>
</nav>
```

It should looks like this:

Item 1 Item 2 Item 3 Item 4

1.2: **Now create a new css file and link it to our html document.**

Add your own styling to give this result:

Item 1 Item 2 Item 3 Item 4

Requirements:

- Color hex code for the background is #D5B0AC, for the text it's #402E2A
- All texts are bold

1.3: **Enlarge the menu items.**

Item 1   Item 2   Item 3   Item 4

Requirements:

- Each menu item should be exactly 100px wide and 30px high.
- Hint 1: ██ ████████████
- Hint 2: ████████████████████████████████████

1.4: **Move the menu items to the center of the screen:**

Item 1	Item 2	Item 3	Item 4

Requirements:

- Hint: ██ ████████

1.5: **Menu items should be highlighted when the user hover their mouse over them. For example when I move my mouse over Item 2:**

Item 1	Item 2	Item 3	Item 4

Requirements:

- Color for the highlighted items are: #FFFFFF text on #9CD08F background.
- Mouse icon change into a pointing hand when it's over a menu item.
- Hint 1: ████████████████████████████
- Hint 2: ██

Part 2: a vertical menu (you're on your own from here)

Clone the html structure of the menu in part 1, then add a new class "menu_vertical" to this clone:

```
<nav class="menu menu_vertical">
  <!-- Use the same HTML structure as part 1 -->
</nav>
```

Add your own styling to give this result:

Item 1
Item 2
Item 3
Item 4

Requirements:

- Same requirements as Part 1, and...
- Both menus must work in the same html page (styling part 2's menu must not break part 1's)
- Note the white line dividing each menu item

Submission: send me a zipped file or whatever with both menus in the same page. Good luck!! ^^

Oh and, questions should be posted into the facebook group. Try to discuss with your peers first.
